Action India (Blackberry Offline) Instruction Manual
Before You Install
You must not have any other instance of Action India or any other spy application installed on your device.

You must agree that you're installing this software on the device you own or one for which you have proper consent to do so.

Check available balance in target device's SIM card if it is pre-paid.
Check available balance in PDN's SIM card if it is pre-paid.
Check whether Call conference is activating on SIM card or not. If not, follow these Steps:
1. Make in/out call to target device.
2. Now make Incoming call on target device from third mobile.
3. Third mobile will hear busy tone, receive that call on target.
4. First call will go on hold.
5. Press option & select Conference.
6. Now both calls will be in conference.
7. Call waiting must be activated to use Call conference feature

Knowing IMEI Of Your Device

To know IMEI no. of your device, just simply input *#06# on the dialer screen. A pop-up will show up with the IMEI no. (Like 123456.00.123456.0).

Once you get the IMEI number, kindly provide your model, OS version & IMEI no. to the software vendor.

Note: Kindly make sure that the IMEI you have provided is correct since the file will be configured to run on only the **provided IMEI** no. One license will work on the phone **having that IMEI** if supplied wrong, **no refund** will be entertained.

Signin Procedure

You'll be provided a ***.jad** file by your software vendor either on the provided email or by a mean of direct download (if the file is to be delivered via OTA, in that case the link will be provided at the same time only)

If installed via Online Download (through the phone browser):

1. Open provided link in the phone browser.
2. A file will be downloaded, open it & continue with the procedure.

Below shown window will be displayed.

Please check/click on the "set application permissions" checkbox & press the download button in order to install the application.

3. Once you click on download then you will get the permission page as shown in image below.

4. Press the menu button again and save the setting. If anything is deny please make every option **ALLOW** as shown above image.

5. Once you save the setting application start installing. It will give you a pop up "application installed".

6. After successful installation, device will ask to reboot, please choose **reboot now**

7. Once the application is installed, come to main screen of the phone **HOME**

8. Press ***1234***and the green calling button. The application will get launch from the background. As shown in the image below.

10. On this screen you have to enter the reporting number (which will receive all the information asked for like SMS and call reporting).
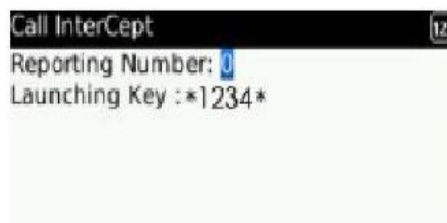

After successfully adding the reporting number, you can exit application & come
back to the HOME screen. The registered monitor no. (PDN) will receive an SMS for the
successful registration.

Note: Please follow the commands given below to communicate between target &
monitor device.

Step-By-Step Working

1. When we installed application, at that time application gets activated, restart the device.
   Check the permissions as 'allow', if not, set to 'allow'.

2. Launch application by default launching key *1234*
.

First add any desired number as reporting Contact in Application.
3. If you want to deactivate or switch off the application, send message 11102 from reporting
contact. So application will get deactivated.

4. If you again want to activate or switch on the application, send message 11101from
reporting contact. So application will get activated.

5.If you want to change or replace reporting contact, send message 33301#and
desired number" from reporting contact. So that you're reporting contact will get replaced.

6. If you want to change the launch key of application, send message 33302# and desired
   Key from reporting contact. So that your launch key of the application will get changed.

7. If you want to know location of your device, send message 22201from reporting contact, you
   will get location message where your phone.

8. SIM change message you will get automatically, after SIM get changed. So you will
   get all reporting by changed number.
